

## Q3a)Noun/Verb analysis (4/5)

- **Feedback :**Your analysis can be better. Your noun list is good, justification is fine. Your verb list is good, your justification is fine.

## Q3b) Analysis class diagram (24.5/40)

- **Feedback :**You have adhered to the proper class diagram syntax. You have a good list of domain classes, you can have better generalization classes like order (auto order, user order). Your attributes are fine. Your operations are fine. There are few missing operations and attributes refer to model answer. Association and capitalization of classes are fine. Your syntax for naming association between classes, directional indicators are fine, there is still scope for improvement. Your cardinalities and multiplicity between classes can be better. You can have better generalization between classes like generalization to produce all the reports. Its a good attempt overall, you seem to have an understanding of a class diagram, I suggest you to refer to the model answer thoroughly and compare your answer with it before your final exam.

## Increment 2 total marks (28.5/45)
